

**CASCADE
RESCUE**
BY HARKEN

Cascade Rescue Company manufactures the highest quality, most durable, reliable, and technologically advanced rescue gear for those who put their own safety on the line to save others. The company's key customers are members of fire departments, skipatrols, EMS units, sheriff's offices, search and rescue units, and military.

Cascade Toboggan was born in 1962 when its founder, a volunteer ski patroller, pulled four people to safety on 'rescue toboggans in a single day and decided there must be a better way to assist both victims and rescuers. Since that era, through an unending commitment to continuous product improvement and new initiatives, the company has continued to expand.

Today Cascade toboggans and rescue litters are in use at virtually every ski area in the USA as well as in twenty-three countries around the world. It

manufactures or distributes 150 other products including gondola and lift evacuation equipment, wheeled rescue litters, cordage and webbing, personal rescue gear, and arborist gear. The company was renamed Cascade Rescue Company in 2009 to more accurately reflect the increasing depth and diversity of its products and services. In 2019, the company agreed to be acquired by Harken Safety and Rescue. The companies share very similar values, a supportive culture for employees and a never satisfied relationship with their product lines.

Cascade Rescue is a Harken brand.

It is headquartered in Sandpoint in the panhandle of Idaho, USA.

CRUISER SS TOBOGGAN

Many years in the making: The Cruiser SS represents the continued refinement and evolution of our groundbreaking Hammerhead Toboggan originally introduced in 2001. It's shape, longitudinally and laterally cambered hull, contours and form make the Cruiser SS

one of the most distinctive sleds in the Cascade line of toboggans. Representing the next generation of rescue toboggans, we incorporated all of the latest technology and innovations from our development team.

Features

- ▲ Right and Ready Adjustable Handles (Patent Pending)
- ▲ Sure-Grip Knurled Handles with T ends
- ▲ Snow Slick
- ▲ HD 6061 Aluminum Top Edge
- ▲ Integral Spray Guard
- ▲ Removable Stainless Handle Mounts
- ▲ Chain Brake and Chain Brake Release
- ▲ Quik-Detach Hardpoint Belay Tail Rope
- ▲ Four Easily Replaceable Carry Handles
- ▲ Patient Comfort and Insulation Pad

Optional Accessories

- ▲ Slide Arrest Anchors (Patent Pending)
- ▲ FastPAX System for Patient Restraint
- ▲ Belay Points
- ▲ Four QuickTAB Patient Straps

100 - THE LEGEND TOBOGGAN

We call the Model 100 "The Legend" simply because its tried and true performance is nothing short of legendary. This ultra-maneuverable rescue toboggan is the industry standard and can be found on almost all of the ski slopes in the United States, Canada, and in over 25 different countries around the world.

The Legend is lighter, stronger, faster, and includes more standard features than ever before. Choose 127 cm fins for hardpack or icy slopes or when being towed behind a snow machine. The 76 cm fins excel in steep, deep powder conditions where lengthy traverses may be encountered and for flat run-out.

Features

- ▲ Stainless Steel Perimeter Frame
- ▲ HD 6061 Aluminum Top Edge
- ▲ Non-Skid Interior
- ▲ Stainless Handles and Locks
- ▲ Crossover Rope
- ▲ Chain Brake
- ▲ Three Patient Straps
- ▲ Quik-Detach Hardpoint Belay Tail Rope
- ▲ Four Easily Replaceable Carry Handles
- ▲ Chain Brake Release
- ▲ Internal Pad
- ▲ Bow Guards

Optional Accessories

- ▲ Slide Arrest Anchors
- ▲ Belay Points
- ▲ Snow Slick
- ▲ QuickTAB Straps
- ▲ FastPAX System
- ▲ Gripper Chain Brake
- ▲ Handle Spray Guard

CRC-RTB-M100-50IT	127 cm fins w/bow guards	23.6	54	231	127	2

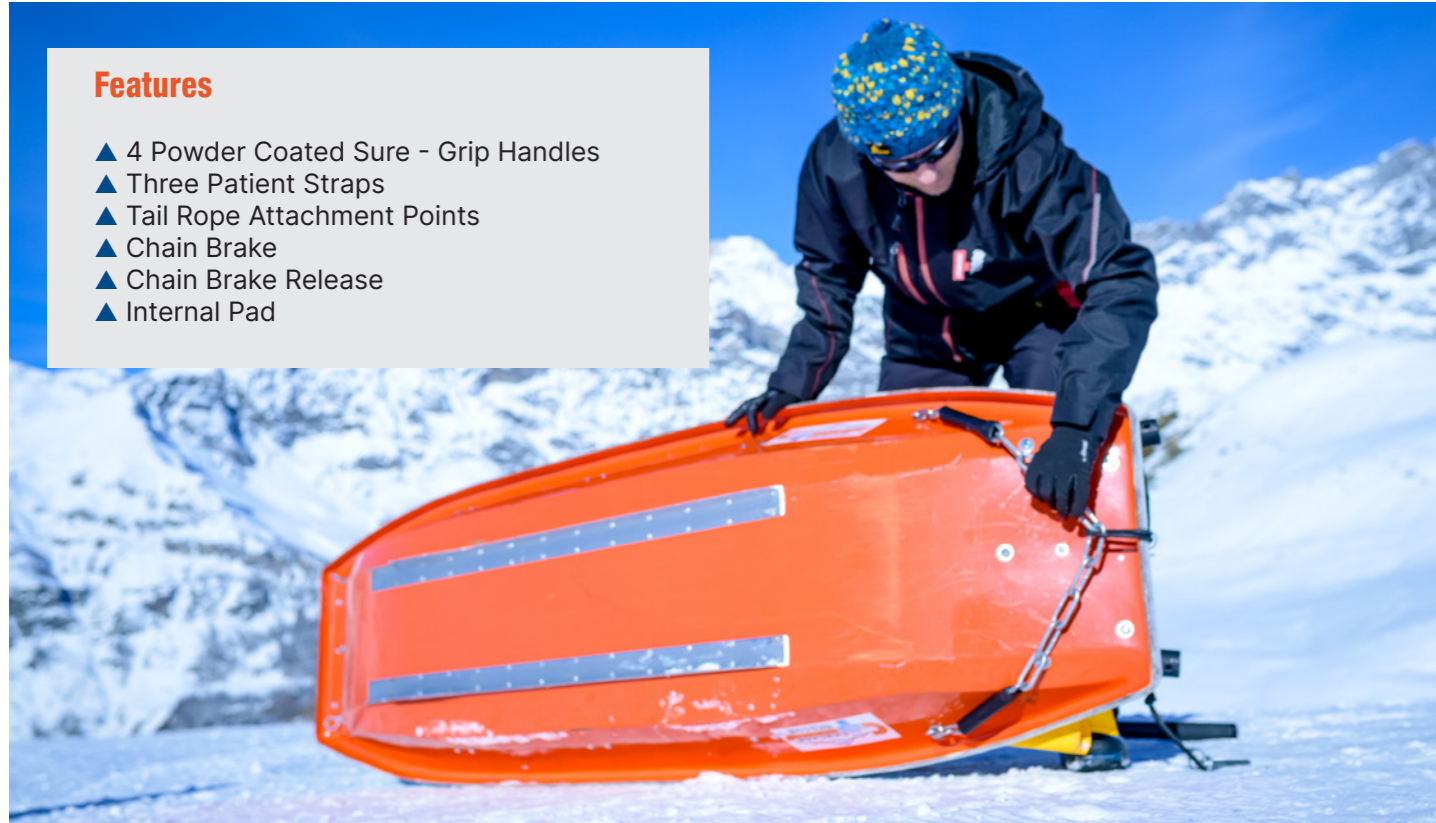

350 - THE EXTREME TOBOGGAN

A favorite of Heli guides, the Cascade Model 350 Extreme is the best double-handle high alpine sled available and features a unique shell and fin design. It delivers superb handling and control in all types of snow and ice conditions – in the fall line or across it. The rolled edge on the Extreme pushes the powder down and prevents it from filling the sled and

covering your patient. Properly trained, its operators can easily work through tight trees, over terrain drops, and other obstacles. Patient comfort can be maximized with two operators by lifting on the four hands to reduce contact with the surface of the terrain. The Extreme is available in one or two piece units.

Features

- ▲ 4 Powder Coated Sure - Grip Handles
- ▲ Three Patient Straps
- ▲ Tail Rope Attachment Points
- ▲ Chain Brake
- ▲ Chain Brake Release
- ▲ Internal Pad

PART N°	DESCRIPTION	WEIGHT kg	WIDTH cm	LENGTH cm (handles folded)	FINS LENGTH cm	FINS DEPTH cm

CRC-RTB-M350-2IT	Extreme two pieces	25	70	236	76	2

350 - THE EXTREME CARBON/TITANIUM TOBOGGAN

The Carbon Extreme represents the state of the art in rescue toboggans designed for high elevation and rugged, remote rescue operations over snow and ice. Exactly the same in dimensions and functionality as our Four Handled Extreme, but with huge differences. The Carbon Extreme is made entirely from multiple layers of Quadriaxial weave carbon fiber and reinforced at key points with commercially pure Titanium. Other standard features include Belay Points, FastPAX Rails, and QuickTAB Straps. Weighing just 10.8 kg, The Carbon Extreme will make your next mission much easier and save time and strain on your team.

Features

- ▲ Two-Piece Powder Coated Sure - Grip Handles
- ▲ FastPAX System
- ▲ Belay Points
- ▲ Three Patient Straps
- ▲ Tail Rope Attachment Points
- ▲ Chain Brake
- ▲ Chain Brake Release
- ▲ Internal Pad

PART N°	DESCRIPTION	WEIGHT kg	WIDTH cm	LENGTH (handles folded) cm	FINS LENGTH cm

CRC-TBA-M350CH2	Two Piece Carbon Handles for Extreme	3.6	70	236	76

SLED LOADER

Compatible with all toboggans

One Sled Loader for many toboggans! The Cascade Rescue Sled Loader is designed to use the chairlift to easily and safely transport all rescue toboggans uphill. Once the toboggan is up, don't take the extra weight of the loader with you, send it down for another toboggan! Orange powdercoated hammer finish for durability and high visibility.

PART N°	PART N°
CRC-TBA-SL	CRC-TBA-SLK (Sled loader installation kit)

SNOWMOBILE TOW BAR

Compatible with 100 Legend toboggans

This snowmobile toboggan hitch is a must for use with your Cascade toboggan model 100. Constructed of heavy gauge one inch square steel tubing and includes a swivel hitch that easily attaches to your snowmobile, allowing you to pull the toboggan along cat-tracks, downhill or through the backcountry.

PART N°
CRC-TBA-STB

STOW-N-GO ADAPTIVE TOWING DEVICE

Compatible with 100 Legend and Cruiser toboggans

The Stow-N-Go Tow Bar will fit virtually any toboggan or litter with Snow Handles. They are designed to stay with the snowmobile or ATV and when needed can be deployed to attach to the handles of the toboggan. Simple, safe and fast, the Stow-N-Go eliminates dedicating toboggans as tow toboggans, removal of handles, and storage of bulky tow bars. It includes a universal hitch for use with pintle hooks and safety chain. The Stow-N-Go can also be ordered with an optional Spray Guard. It's constructed of heavy gauge, powder coated steel.

PART N°	WEIGHT	DIMENSION FOLDED	DIMENSION OPENED
CRC-TBA-SAG	7.2 kg	55.8 X 58.4 cm	96.5 x 58.4 cm

MODEL 350 EXTREME-SNOWMOBILE TOW BAR

Compatible with 350 Extreme toboggans

Where form meets function. This tow bar will fit all Model 350 Extreme Rescue Toboggans. Simply remove the handles from your sled and insert the specially designed articulating tubes into the handle receivers. Pin them in just as you would the normal handles and attach to your favorite snowmobile. The tow bar also will pivot allowing it to be extended for use with a snowmobile or folded inside the sled for storage.

PART N°
CRC-TBA-M350STB

PATIENT PROTECTOR

Compatible with all toboggans

Don't confuse this with the cheap imitations. Manufactured of heavy duty, 18 oz, waterproof vinyl with Velcro closures. The heat sealed, padded wrap is tailored to easily enfold your patient to help keep them warm, dry, and feeling secure on their way down the mountain. The head piece is translucent vinyl and can be split to wrap around the patient's shoulders rolled up to act as a pillow or head stabilizer, or can be pulled over the patient to protect their head. When not being used to protect people, the Patient Protector doubles to keep your gear organized and tightly stowed in your toboggan.

PART N°
CRC-TBA-PP

CASCADE PAD/STRETCHER

Compatible with all toboggans

The Cascade Pad/Stretcher combines the insulation and anti-shock value of a closed cell ethafoam pad with the convenience of handles for easy transfer of patient to and from the toboggan. Constructed of blue waterproof 18 oz reinforced vinyl with eight 1.5" polypropylene webbing handles, the Pad Stretcher may be easily decontaminated of all bodily fluids.

PART N°	WEIGHT	DIMENSION
CRC-TBA-TPS	680 gr	177.8 x 40.6 cm

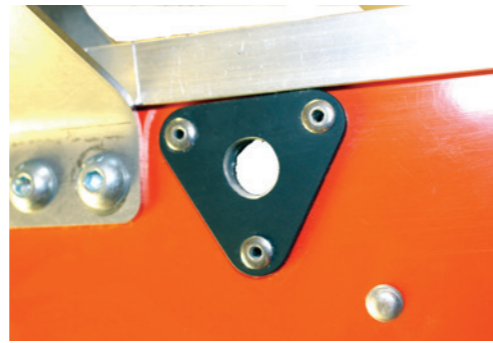

BELAY POINTS

Compatible with all toboggans

Add horizontal/vertical lift capabilities to your toboggan. Belay points are press riveted to the sides of the toboggan and will accept most large carabiners. Installed only at the factory.

PART N°

CRC-TBA-M100-BP

TOBOGGAN PAD

Compatible with all toboggans

New and improved! We're always looking for better materials and we've found a great new material for toboggan pads. This durable closed cell foam pad provides additional insulation and comfort for patients and is xtremely abrasion and tear resistant. It can be ordered installed with all new toboggans or user installed.

PART N°	DIMENSION
CRC-TBA-EP	198 X 43.2 X 1.27 cm

Included in the 100 Legend and 350 Extreme toboggans

QUICK TAB STRAPS

Compatible with all toboggans

The 3.8 cm nylon Patient Straps include easy on, easy off buckles. These straps are a standard in all of our Professional Series Litters and have no mechanical parts to fail. The buckles feature rust resistant double zinc plating and the straps have an MBS of over 450 kg.

PART N°

CRC-TBA-QTS

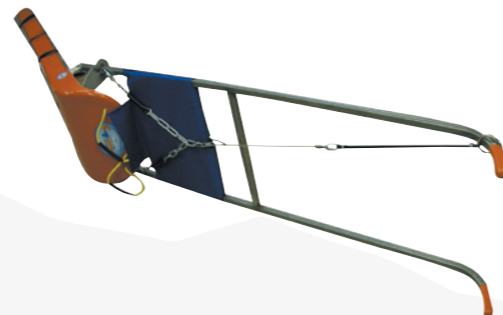

CHAIN BRAKE RELEASE

Compatible with all toboggans

Easily deploy or retract the chain brake on your toboggan without stopping, turning around, or taking your eyes off the terrain in front of you. To deploy, simply slip the ring off the handle "catch". Elastic cord assists with easy retraction of the brake. Simply slide the ring up the handle and lift up slightly on the nose of the toboggan. The brake will then pop out and can be locked in the retracted position.

PART N°

CRC-TBA-CBR

GRIPPER CHAIN BRAKE

Compatible with all toboggans

Get a Grip! This is the ultimate brake for those steep, icy, or hardpacked snow conditions. May be used in place of the Standard Chain Brake or in addition to it as a mid chain. Tough, plated carbon steel teeth dig in to make speed control easy.

PART N°

CRC-TBA-GCB

LEGEND HANDLE SPRAY GUARD AND STORAGE POUCH

Compatible with 100 Legend toboggans

A great way to protect your passenger from snow spray as you transport them down the mountain. The Spray Guard attaches to the handles of your Model 100 Legend toboggan and can be put on or removed with ease. The Spray Guard is also a perfect place to store additional rope, C-Collars, or other First Aid gear. It may be ordered with new toboggans, handles, or installed on existing equipment.

PART N°

CRC-TBA-M100-MSG

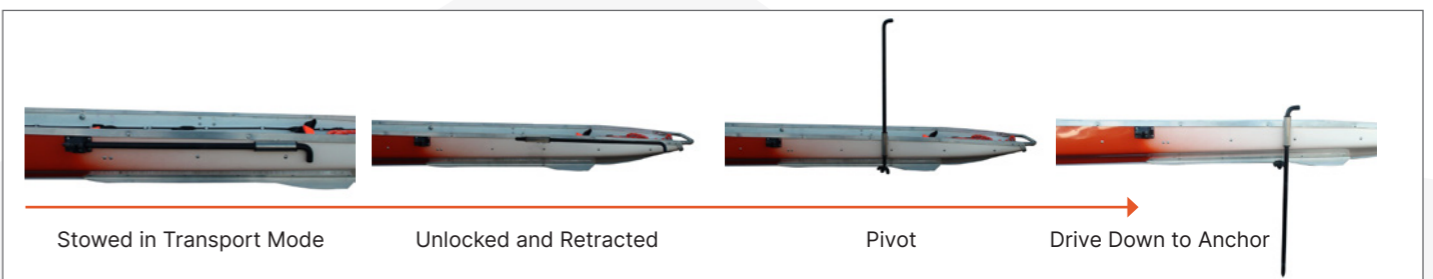

SLIDE ARREST ANCHOR

Compatible with all toboggans

The Slide Arrest Anchor System is simple yet very useful. Permanently attached to the toboggan, this system is deployed to anchor the toboggan to the mountain while loading or practicing First Aid on a patient on the hill. No more struggling to anchor a toboggan with skis, snowboards, or ski poles. Simply rotate the Slide Arrest Anchor and drive it into the snow.

PART N°

CRC-TBA-SAA

2. LIFT EVACUATION

LIFT EVACUATION

CABLE GLIDER

The Cable Glider is designed specifically for gondola and tram customer evacuation. Its made almost entirely of high-grade Titanium, and at less than 14 lbs, the Cable Glider can be easily one-handed onto the gondola cable. The Cable Glider features a full cable capture system, an extendable foot rest and a comfortable down-Tube and seat that make it easy for the rescuer to mount, travel the cable, and dismount. The Cable Glider is extremely safe. When attached to the cable it can be secured with a manual brake lock. Once the rider (rescuer) mounts the Cable Glider, the brake is automatically engaged and locked and the Glider will not travel down the cable until the operator applies positive force to the brake lever, with the speed controlled. If the brake lever is released, the Glider will stop. This “deadman” style brake mechanism eliminates the chance for a runaway, even if the operator is incapacitated. It may also be used for zip lines and chairlift rescues.

PART N°	DESCRIPTION	WEIGHT kg
CRC-LFT-CGL	Cable Glider Left	4.5
CRC-LFT-CGR	Cable Glider Right	4.5

HANG GLIDER

The Hang Glider is a product that evolved from the popular Cable Glider. We replaced the downtube, seat, and footrest assembly on the Cable Glider with a fast clip-in attachment point thereby creating a compact, lightweight vehicle that allows a rescuer to hang from their full body harness. This is deal for situations that require minimum weight and bulk. The Hang Glider is suitable for most any rescue scenario that requires getting to a gondola, tram, or chairlift as quickly and easily as possible. The Hang Glider excels on cables in excess of 35 degrees. Just like our Cable Glider, the Hang Glider is made almost entirely of high-grade titanium, and weighs just 10 lbs.

When attached to the cable it can be secured with a manual brake lock. Once the rider (rescuer) places weight on the Hang Glider, the brake is automatically engaged and locked and the Glider will not travel down the cable until the operator applies positive force to the brake lever., easily controlled. If the brake lever is released, the Glider will stop. This “deadman” style brake mechanism eliminates the chance for a runaway, even if the operator is incapacitated.

Features

- ▲ Constructed of precision machined Grade 9 titanium and T6 tempered aluminum
- ▲ Extremely light weight (11lbs/5kg)
- ▲ Does not require backup belay –one operator use
- ▲ Designed for rescuer to be suspended in a harness
- ▲ 600lb working load limit (2.7kN)
- ▲ Self-braking with Auto-Stop functionality
- ▲ Suitable for Cables 19mm to 58mm on gondolas, chairlifts and ziplines
- ▲ Operates at angles of declination from 1 degree to 45 degrees
- ▲ Replaceable brake pads
- ▲ Long service life

PART N°	DESCRIPTION	WEIGHT kg
CRC-LFT-HGL	Hang Glider Left	6
CRC-LFT-HGR	Hang Glider Right	6

CHAIR LIFT EVACUATOR SEAT

The Cascade Rescue Chair Lift Evacuator Seat is the best all around “T” style evacuation seat available. Independantly tested and constructed of heavy duty square tube steel, then powder coated with a special grip finish and fitted with a cryogenic plastic seat base. All stress points are double welded to ensure there are no failures during operation. A low stretch kernamantle rope harness is attached to the top loop to secure under the evacuee’s arms. The seat is serialized and independantly load tested for safety. Certificate of Independant Testing available upon request.

PART N°

CRC-LFT-CLES

LIFT EVAC THROW BAG

Heavy duty Cordura® nylon throw bag that is weighted just right at the bottom to allow you to sling it over the haul line using the attached throw strap. Includes 22.8 m of light cord attached to the inside of the bag.

PART N°

CRC-LFT-TB

STABLESEAT AERIAL RESCUE VEST (ARV)

The Cascade Rescue StableSeat Aerial Rescue Vest is designed to be simple, functional, and cost effective. Thoughtfully constructed of the highest quality materials, it’s easy to put on and will stand up to the most extreme use - time and again. Extended, padded neck collar provides head and neck support.

The StableSeat ARV is certified NFPA1983, Incorporated in the 2022 edition of NFPA 2500 class III Victim Extraction Device. Two rear external grab handles and two front grab handles for patient handling. Constructed from 1,000-denier Cordura® nylon with 3.8 cm heavy duty external webbing suspension system and mesh lower back panel for water drainage. Includes high visibility reflective striping and is adjustable to fit small or large adult patients.

Includes compression bag.

PART N°	LOAD CAPACITY
CRC-HRB-SS1.SER	226 kg

ROPE SAVER/LINE BELAY

Save those expensive ropes! Heavy gauge stainless steel construction – our line savers are the industry standard. Easily secured over most chairlift cables, these line savers will prevent rope abrasion from cables and on most lifts, keep the rescue line from sliding under the chair attachment point. Virtually identical to our Line Saver, the Line Belay is designed to allow the creation of mechanical advantage systems to assist with easier descents or ascents. Excellent for use by the rescuer for unconscious evacuees or just those that need some extra assistance. Independently tested to 1.814 kg.

PART N°

CRC-LFT-RS (Rope Saver) | CRC-LFT-LB (Line Belay)

CASCADE RESCUE ROPE BAG

Constructed of heavy duty coated Cordura®. Two compression straps ensure your ropes and other gear do not shift. Adjustable shoulder straps ensure a snug fit. Spring-loaded loop drawstring closure. Will hold up to 90 m of 11 mm rope and evacuation equipment with ease.

PART N°

CRC-LFT-RB

CASCADE RESCUE WATERPROOF ROPE/EVAC BAG

Patterned after our super popular Rescue Rope Bag, this bag has enough storage room for 90 m of 11 mm rope, carabiners, harnesses, belays and more. The triple layered bottom sports a slash pocket to insert the base of your evac seat, allowing you to strap the upright of the seat to the outside of the bag. The package is complete with an adjustable shoulder strap. Just sling it over your shoulder and go!

PART N°

CRC-LFT-WCLEB

3. RESCUE

PROFESSIONAL SERIES LITTERS

The Professional Series Rescue Litters offer the best of all worlds with reasonable pricing and the most advanced features of any rescue stretcher available today. NFPA Certified and independently tested by UL, these litters are designed for the demanding professional. Constructed with a 2.54 cm tubular top rail, double walled thickness at the head and foot, and 1.9 cm supporting cross members with 0.9 cm secondary railing. The two piece version uses the trademark Cascade Rescue FastLock System for rapid 10 second takedown/reassembly. Stainless steel and Titanium versions come standard with our Patented Articulating Lift Points (ALPs).

Professional Series Litters are CE certified under the MEDICAL DEVICE REGULATION (EU) 2017/745.

Features

- ▲ Four Articulating Lift Points (Except Professional Steel)
- ▲ Patient Contour Support
- ▲ Four Quick-Tab Restraint Straps
- ▲ Tapered or Rectangular Shape *(on request)*
- ▲ Integral Padded Backboard
- ▲ Double Wall Head/Foot Construction
- ▲ UV-Resistant Polyethylene Mesh Liner
- ▲ One or Two Piece

Fast-Lock Couplers

Our Safe-Lock couplers are made of the same durable materials we use to make our litters and feature a push button unlocking mechanism. Unlike other products that use less durable aluminum and are riveted on, our Safe-Lock couplers are 100% titanium or stainless and are TIG welded to the frame, ensuring a safe and long lasting fit.

Articulating Lift Points (ALPs)

Our patented ALPs allow a variety of litter rigging to be used. Position them straight up and use them with a traditional four point harness or rotate them to the outside to facilitate use with a two point harness for vertical work. When not needed, simply fold them in the down position and they are completely out of the way with no potential for patient injury.

STAINLESS STEEL PROFESSIONAL LITTER

TERRA TAMER LITTER WHEEL

The Cascade Rescue Terra Tamer is light, fast and lean. Affectionately known as “Da Phatty,” it weighs in at an astounding 6.9 kg! The framework and fork system is constructed of pure titanium, making the Terra Tamer the lightest all-purpose patient transport on the market. The super plush 4.25” fatty tire bounds over trail obstacles and is unbelievably stable. Rounding out the package is a disc brake and all stainless steel hardware.

The attachment system has been redesigned. Now, simply slip the custom designed hooks over the top railing of your litter and use the new compact stainless steel ratchets to cinch it down. With this system, the Tamer can even be mounted on most rescue toboggans.

The Terra Tamer has been tested in the most harsh and demanding environments, withstanding brutal abuse. It excels in nearly all conditions, just at ease on mud, snow, and sand as it is rolling over big obstacles blocking your way. Not only is it the lightest wheel out there, it also can be broken down for easy load sharing and transport. Don't just suffer through your back country rescue, tame it.

PART N°	DESCRIPTION	WEIGHT kg
CRC-PTR-TT	Terra Tamer for Professional Litters	6.9

EQUALIZER - ADJUSTABLE LITTER HANDLE SYSTEM

Finally! A litter handle system that actually works and is so light, you'll hardly know it's there. The Equalizer represents years of research and development by Cascade Rescue Company. The Equalizer is available in both titanium and stainless steel models and features a unique 24 position system allowing the operators to quickly change handle positions based upon operator height or varying terrain conditions.

For transport to the scene, or for high or low incline work, the handles of the Equalizer may be positioned so they nest against the side of the litter, or removed entirely and stowed in a pack.

PART N°	DESCRIPTION	WEIGHT kg
CRC-RLA-PSSLH	Stainless Steel Equalizer	4.5
CRC-RLA-PSTLH	Titanium Equalizer	3.3

TAMER TRANSPORT PACK

The Tamer Transport Pack (TTP) was designed for the Cascade Rescue Terra Tamer and accessories. This pack was made with two overriding goals in mind: To protect your equipment and to make it easy for rescuers to transport gear to the rescue scene. The TTP features two main internal compartments to stow and protect the Terra Tamer Litter Wheel. Extra tools, parts, and gear can be organized in two smaller internal compartments. Externally, the TTP is designed to carry a two piece litter and two side pockets have been integrated to accept four Equalizer adjustable handles.

PART N°
CRC-PCK-TTP

LITTER BACK-PACK BAG

A great solution for storage of your two piece litter and related gear that also doubles as a weather-proof backpack. This bag features two wide padded webbing straps attached to a heavy duty Cordura® bag with a weatherproof closure. Upper and lower suspension help keep the pack close to your body and easy to carry. Compression straps keep the load stable. If you are in a hurry, prepack your litter and gear in the bag and it's ready when you are.

PART N°

CRC-RLA-LBPB

GUARDIAN LITTER SHIELD

This is a reinvention of the original Cascade Rescue Guardian Litter Shield. Due to its advance shape and profile, the new Guardian deflects debris and rocks away from the patient regardless of strike angle. Made from precision molded, tinted polycarbonate plastic, the new Guardian can take the punishment and abuse tough environments dish out.

PART N°

CRC-RLA-GLS1

GEAR ORGANIZER BAG

Featured in our popular Litter Rigging Kit, this handy bag has two main compartments. One side is completely open for storing larger, bulkier items while the other side folds open with individual see-through mesh pockets to keep components organized and readily available. The entire bag is surrounded by 2 inch compression straps with Fastex buckles and is capable of being strapped to the outside of a backpack, med bag, or litter. Made of tough waterproof 1000 d Cordura® and has a comfortable tubular webbing handle on top.

PART N°

CRC-PCK-GOB

FLOTATION SYSTEM

This Litter Flotation System was designed to fit all Cascade Professional Series Litters and Advance Series Litters with FastPAX rails. It is self-righting and maintains the litter in a head-high horizontal position for ease of loading. Capable of floating the litter, patient, and at least one rescuer. Easily attached and removed for storage this Flotation System is ideal for ocean, lake, and swiftwater rescue. It will also fit most tube frame litters of other manufacturers.

PART N°

CRC-RLA-LFS

LITTER COVER

Designed to protect your litter and other rescue supplies from sun, rain, snow, etc., even when stored on top of your rescue vehicle. There is plenty of room for blankets, pad-stretchers, and more, and still allow easy removal of your litter. Manufactured of 18 oz striated vinyl for long life and weather protection and has three handles and a weatherproof closure.

PART N°

CRC-RLA-LLB

PRO LITTER SKIN

This is a great solution if your rescue scenario demands that your litter be dragged across anything abusive or rough. Ready to deploy within moments - simply attach the Pro Litter Skin to a Professional Series Litter and you're ready for action. Thanks to the new attachment system, installation has never been faster or easier.
